ecosan – closing the loop in wastewater management and sanitation

Assignments for week 2

Week 2 of the ecosan course (November 17-20) will focus on two case studies (Uganda and Sweden, descriptions see course material) submitted by Justyna and Manuel. We prepared two referring discussion forums. The idea is what you use the “1. weeks course-knowledge” to work with your course fellows and the tutors on this cases. We will again have classroom talks every day at 11:00 to discuss open questions.

The assignments of week 2 will also focus on this two case studies. Please choose one topic of your interest and submit a short (1 page) paper discussion this topic. Please submit your assignments by November 20 using the editor in the assignment window.
