Table of Contents

Greeting and Opening Session

Keynote addresses

Moderation

Arno Tomowski (Head of Division Infrastructure and Environment, GTZ, Germany)

Welcoming address

Wolfgang Schmitt (Managing Director, Deutsche Gesellschaft für Technische Zusammenarbeit (GTZ) GmbH, Germany)

Ecosan - what kind of advocacy is needed

Hon. Maria Mutagamba (Minister of State for Water, Uganda)

Why the flush toilet is ecologically mindless and why we need a paradigm shift in sewage technology

Sunita Narain (Director, Centre for Science and Environment, India)

Challenges in the sanitation sector after Johannesburg

Manfred Konukiewitz (Head of Division for Water, Energy, Urban Development, BMZ, Germany)

Ecosan - experiences and conclusions from the KfW’s perspective

Wolfgang Kroh (Senior Vice President, Kreditanstalt für Wiederaufbau, Germany)

Reasons for and principles of ecological sanitation*

Christine Werner (Team Leader ecosan-project, GTZ, Germany)

Current technical options for ecological sanitation

Ralf Otterpohl (Chairman Specialist Group Ecological Sanitation, IWA, Director Institute for Wastewater Management TU Hamburg-Harburg, Germany)

The role of ecosan in achieving sustainable nutrient cycles

Håkan Jönsson (Co-Chairman Specialist Group Ecological Sanitation, IWA, Associate Professor, Swedish University of Agriculture Sciences, Sweden)

Addressing the environmental dimensions of sanitation

Cees van de Guchte (Senior Programme Officer, Global Programme for Action for the Protection of the Marine Environment from Land-based Activities, UNEP, The Netherlands)

The UNDP’s approach and activities in ecological sanitation

Ingvar Andersson (Senior Water Policy Advisor, UNDP, USA)

Arno Rosemarin (Communications Director, Stockholm Environment Institute and Manager EcoSanRes Programme, Sweden)

*This paper has been peer reviewed by the symposium scientific committee
Session A: progress, policies and legislation

Chairpersons

Ingvar Andersson (UNDP, USA)
Xiangjun Yao (Ministry of Agriculture, China)

Lectures

The EU water initiative, its research component and ecosan
Zissimos Vergos (European Commission, Belgium) 53

The BMBF programme “decentralized (alternative) water systems” - international projects
Rüdiger Furrer (Research Center Karlsruhe, Project Agency for Water Technology and Waste Management, Germany) 59

Demand on and difficulties for implementation of ecosan concepts in China
Jiang Zhang (Institute for Sustainable Technology, Zhejiang University, China), Jun Chen 65

New legislation for on-site sanitation in Finland*
Harri Mattila (Häme Polytechnic, Environmental Engineering, Finland) 67

Key-activities, services and current pilot projects of the international ecosan programme of GTZ*
Christine Werner, Heinz-Peter Mang, Ve Kessen (GTZ, Germany) 75

EcoSanRes - a Swedish international ecosan programme
Arno Rosemarin (Stockholm Environment Institute, Sweden) 83

Guidelines for the implementation of the Bellagio Principles and the household centred environmental sanitation approach (HCES)*
Roland Schertenleib, Antoine Morel (EAWAG/ SANDEC, Switzerland), John Kalbermatten, Darren Saywell 93

Tentative guidelines for agricultural use of urine and faeces*
Björn Vinnerås, Håkan Jönsson (Swedish University of Agricultural Sciences, Sweden), Eva Salomon, Anna Richert Stinzing 101

Oral poster presentations

Ecosan - clean production mechanism under the Kyoto-protocol
Gert de Bruijne, Nadine Dulac (WASTE, Netherlands) 109

Rainwater harvesting, water re-utilisation and ecological sanitation - further developments
Dietmar Sperfeld, Erwin Nolde (Fachvereinigung Betriebs- und Regenwassernutzung e.V., Germany) 111

*This paper has been peer reviewed by the symposium scientific committee
### Session B: social and economic aspects

#### Chairpersons

- **Jan Olof Drangert** (Linköping University, Sweden)
- **Katarzyna Kujawa-Roeleveld** (Wageningen University, The Netherlands)
- **Richard Holden** (The Mvula Trust, South Africa)
- **Judith Lienert** (EAWAG, Switzerland)

#### Lectures

<table>
<thead>
<tr>
<th>Title</th>
<th>Author(s)</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Requirements of sanitation systems - the flush toilet sets the standard for ecosan options*</td>
<td>Jan-Olof Drangert (Linköping University, Sweden)</td>
<td>117</td>
</tr>
<tr>
<td>The development and implementation of ecosan in the Netherlands: social opportunities and risks</td>
<td>Bas van Vliet, Nanke Stein (Wageningen University, Netherlands)</td>
<td>125</td>
</tr>
<tr>
<td>Lessons learnt on ecosan in Southern Africa - towards closed-loop sanitation?</td>
<td>Catherine Wirbelauer (DED/IUCN, Botswana)</td>
<td>135</td>
</tr>
<tr>
<td>Experiences with ecosan in Danish allotment gardens and in development projects *</td>
<td>Henrik Bregnhøj, Ann Marie Eilersen, Martin Krayer von Krauss (Technical University of Denmark, Denmark), Arne Backlund</td>
<td>143</td>
</tr>
<tr>
<td>Psychology and sanitation: a personal perspective</td>
<td>Isabella Wilke (South Africa)</td>
<td>151</td>
</tr>
<tr>
<td>Source separation - new toilets for Indian slums</td>
<td>Johannes Heeb (Seecon GmbH, Switzerland), Ken Gnanakan</td>
<td>155</td>
</tr>
<tr>
<td>A methodology combination to expose and assess water and sanitation related household behaviour</td>
<td>Helena Krantz (Linköping University, Sweden)</td>
<td>163</td>
</tr>
<tr>
<td>Factors which have influenced the acceptance of ecosan in South Africa and development of a marketing strategy</td>
<td>Richard Holden (The Mvula Trust, South Africa), Riana Terreblanche, Mary Muller, Nawasan</td>
<td>167</td>
</tr>
<tr>
<td>Integrated management of water resources in projects of German financial cooperation</td>
<td>Uwe Stoll, Bernd Schönewald (Kreditanstalt für Wiederaufbau, Germany)</td>
<td>175</td>
</tr>
<tr>
<td>Ecological sanitation in Mozambique: baseline data on acceptability, use and performance*</td>
<td>Rebecca J. van der Meulen, Christine L. Moe (Rollins School of Public Health of Emory University, USA), Edward D. Breslin</td>
<td>183</td>
</tr>
<tr>
<td>Urban household perception of urine-excreta and solid waste source separation in urban areas of Ghana*</td>
<td>George Danso, Pay Drechsel, Lucy Gyiele (International Water Management Institute, Ghana)</td>
<td>191</td>
</tr>

</table>

*This paper has been peer reviewed by the symposium scientific committee
Contents

Assessment of community knowledge attitudes, practice, behaviour and acceptance of ecological sanitation in peri-urban areas of Harare
Edward Guzha, Cleophas Musara (Mvuramanzi Trust, Zimbabwe) 197

Environmental alternative to sanitation and food sovereignty
Alberto Ysunza-Ogazón, Jaime Leyva S., Enriqueta Martínez M., Silvia Díez-Urdanivia, Laurencio López N. (Centro de Capacitación Integral para Promotores Comunitarios, México) 203

Cost comparison of conventional and modern sanitation solutions*
Markus Lechner, Günter Langergraber (EcoSan Club, Austria) 211

Oral poster presentations

Application of ecosan principles through public private partnership projects - prospects and limitations
Hartlieb Euler, Pedro Aibéo (TBW GmbH, Germany) 219

Human urine from city to field - towards a sustainable co-operation?
Susanna Deggaard (Kretsloppskontoret Recycling Office, Sweden) 227

Poster presentations

Complexity of basic needs and the role of ecological sanitation in the rural region of Lake Victoria, Tanzania
M. Grottke, D. Grottke, D. Karrasch, V. Kleineidam (Fachhochschule Lübeck, Germany) 231

Preliminary survey based on community need leading to sustainable sanitation – an Indonesian case study
Suriptono (Merdeka University, Indonesia) 235

Rural Sanitation in Ghana
Michael Tsiagbey (Council for Scientific and Industrial Research, Ghana) 239

Session C: rural and peri-urban case studies

Chairpersons

Grietje Zeeman (Wageningen University, The Netherlands)
Paul Calvert (EcoSolutions, India)
Håkan Jönsson (Swedish University of Agricultural Sciences, Sweden)
Rose Kaggwa (National Water and Sewerage Cooperation, Uganda)

Lectures

Acceptance of ecosan concepts in Tanzania - a case study of “piloting ecological sanitation Majumbasita Dar Es Salaam” *
Alfred J. Shayo (EEPCO, Tanzania) 245

National strategy to promote ecological sanitation in Uganda
Austin Tushabe (Ministry of Lands, Uganda), Elke Müllgegger, Andreas Knapp 255

An effective dry sanitation system - the Enviro Loo
Brian La Trobe, Gavin La Trobe (Enviro Options (Pty) Ltd., South Africa) 263

Nutrient utilization by urine separation - experience from the Lambertsühl project*
Martin Oldenburg (Otterwasser GmbH, Germany), Jutta Niederste-Hollenberg, Andreas Bastian, Gitta Schirmer 269

*This paper has been peer reviewed by the symposium scientific committee
Contents

**Ecosan in past and present effort in Nepal**
Nawal Kishor Mishra (Department of Water Supply and Sewerage, Nepal) 277

**Holistic ecosan small-town planning: the TepozEco pilot program**
Ron Sawyer, Anne Delmaire (Sarar Transformación SC, Mexico), Andrés A. Buenfil 279

**Ecosan: an unsuccessful sanitation scheme at a rural school: Lessons learned from the project failure**
Aussie Austin (CSIR Building and Construction Technology, South Africa) 287

**Longitudinal study of double vault urine diverting toilets and solar toilets in El Salvador**
Christine L. Moe, Ricardo Izurieta (Rollins School of Public Health of Emory University, USA) 295

**Skaneateles lake watershed composting toilet project**
Richard Abbott (Public Health Sanitarian, City of Syracuse, USA) 303

**Experiences in setting up ecosan toilets in shoreline settlements in Uganda**
Rose Kaggwa (National Water and Sewerage Corporation, Uganda), Sonko Kiwanuka, Tom Okurut Okia, Farouk Bagambe, Chris Kanyesigye 309

**Results in the use and practise of composting toilets in multi story houses in Bielefeld and Rostock, Germany**
Wolfgang Berger (Berger Biotechnik GmbH, Germany) 317

**Bringing ecosan to South Asia**
Paul Calvert (EcoSolutions, UK) 323

**Oral poster presentations**

**Community led sanitation blocks systems in Kenya**
David Kuria (Intermediate Technology Development Group, Kenya) 331

**Economical and ecological benefits of decentralised, small-scale human excreta management system in Nepal**
Govind R. Pokharel (University of Flensburg, Germany), Deepak R. Gajurel 335

**Eco-toilet: a sustainable approach of sanitation in the lowland eco region of Nepal**
Krishna Mani Lamichhane (Department of Water Supply and Sewerage, Nepal) 339

**Owner-built composting toilets in Lismore, Australia: meeting the needs of users and regulators**
Sam Walker, Leigh Davison (Southern Cross University, Australia) 345

**Poster presentations**

**Waste separation and composting at the household level: peri-urban interface, Kumasi, Ghana**
Andrew Bradford, Duncan McGregor, David Simon (Centre for Developing Areas Research, University of London, UK), Korsi Ashong 349

**Water development and sanitation improvement activities development**
James Mwami (Busoga Trust, Uganda) 353

**The SUSSAN project: strategies towards sustainable sanitation - presentation of an Austrian applied research project**
Markus Starkl, Raimund Haberl (University of Natural Resources and Applied Life Sciences, Austria) 355

**The integrated water management system at the “Kulturfabrik Mittelherwigsdorf”**
Annekathrin Kluttig, Gernot Kayser, Gerlinde Liepelt, Heike Heidenreich (Germany) 359

---

*This paper has been peer reviewed by the symposium scientific committee*
Session D:
hygiene and environmental assessments

Chairpersons
Christine L. Moe (Rollins School of Public Health of Emory University, USA)
Thor-Axel Stenström (Swedish Institute for Infectious Disease Control, Sweden)

Lectures
Risk assessment of local handling of human faeces with focus on pathogens and pharmaceuticals
Karsten Arnbjerg-Nielsen, Linda Hansen, Jesper Kjølholt, Frank Stuer-Lauridsen, Arne Bernt Hasling (COWI, Sweden), Thor Axel Stenström, Caroline Schönning, Therese Westrell (Swedish Institute for Infectious Disease Control, Sweden), Anders Carlsen, Bent Halling-Sørensen

Environmental systems analysis of small-scale sanitation solutions*  
Hans B. Wittgren, Andreas Baky, Ola Palm (JTI-Swedish Institute of Agricultural and Environmental Engineering, Sweden)

Faecal contamination of greywater - assessing the treatment required for a hygienically safe reuse or discharge*  
Jakob Ottosson (Swedish Institute for Infectious Disease Control, Sweden)

Problems and potentials for urine separation in a small village with a wastewater treatment plant operated with extended nutrient removal *  
Jes la Cour Jansen, Elsebeth Koldby (Lund Institute of Technology, Sweden)

Life cycle microbial risk analysis of sustainable sanitation alternatives  
Simon Fane (University of Technology, Sydney, Australia)

Recommendations for the reuse of urine and faeces in order to minimise the risk for disease transmission*  
Caroline Schönning (Swedish Institute for Infectious Disease Control, Sweden)

Microbiological risk assessment of greywater recycling*  
Friedrich-Karl Lücke (University of Applied Science Fulda, Germany)

Chances and risks of sustainable sanitation (SuSan) in Europe  
Helmut Lehn, Christine Nicklas (Akademie für Technikfolgenabschätzung, Germany)

Oral poster presentations
Survival of faecal indicators and bacterial and parasitic pathogens in source separated human urine  
L. T. Jørgensen, I. Tarnow, A. Forslund, A. Dalsgaard (The Royal Veterinary and Agricultural University, Denmark), H.L. Enemark

Fate of estrogens in wastewater treatment systems for decentralised sanitation and re-use concepts*  
Tilia de Mes, Grietje Zeeman (Wageningen University, Netherlands)

Poster presentations
Assessing the risks to groundwater quality from unsanitary well completion and on-site sanitation*  
Aidan Cronin, Steve Pedley (Robens Centre for Public and Environmental Health, UK), Ned Breslin, Richard Taylor

*This paper has been peer reviewed by the symposium scientific committee
Composting of faecal material – a hygienic evaluation
Annika Holmqvist, Jacob Møller, Anders Dalsgaard (The Royal Veterinary and Agricultural University of Denmark, Denmark)

The impact of ecological sanitation on parasitic infections in rural El Salvador
Lana Cohen Corrales, Ricardo Izurieta, Christine L. Moe (Rollins School of Public Health of Emory University, USA)

Reduction of faecal microbiological indicators in different compost toilets
Jacob Møller, A. Forslund, Anders Dalsgaard (University of Denmark, Denmark)

Opportunities for eco-sanitation in East-Europe: a Romanian example
Margriet Samwel (WECF, The Netherlands)

Session E:
new technological developments and experiments

Chairpersons
Peter Wilderer (Technical University Munich, Germany)
Roland Schertenleib (EAWAG/SANDEC, Switzerland)

Lectures
New technological development in ecological sanitation
Ralf Otterpohl (Technical University Hamburg-Harburg, Germany)

Thermodynamics of struvite precipitation in source-separated urine*
Mariska Ronteltap, Martin Biebow, Max Maurer, Willi Gujer (EAWAG, Switzerland)

The functional analysis of compost toilet for remote areas*
Euiso Choi, Junki Choi, J. Ahn, Zuwhan Yun (Korea University, Korea)

Vacuum sewers - an element in ecosan systems
Stefan M. Behnke (Roediger GmbH, Germany)

Dry fermentation biogas technology - a practical approach for closed loop sanitation, waste stabilisation and nutrient recovery
Michael Köttner, Achim Kaiser, Mercy Viviana Avendaño (International Biogas and Bioenergy Center of Competence, Germany)

Solids-liquid separation as the first step and VRM membrane bioreactor as an elementary component of ecosan
Oliver Christ, Hans G. Huber (Hans Huber AG, Germany)

Anaerobic digestion of physiological waste and kitchen refuse towards resource management in the DESAR concept*
Katarzyna Kujawa-Roeleveld, Tarek Elmitwalli, Marc van Leeuwen, Ahmed Tawfik, Titia de Mes, Grietje Zeeman (Wageningen University, The Netherlands)

Oral poster presentations
Saving water and recovering nutrients by a closed loop system for toilet flushing - pre tests
Björn Lindner, Felix Tettenborn, Holger Gulyas, Kolja Breuer, Johannes Mühlenstädt, Ralf Otterpohl (Technical University Hamburg-Harburg, Germany)

*This paper has been peer reviewed by the symposium scientific committee
Contents

Investigation on the effectiveness of Rottebehaelter for the pre-treatment of brown water in source control sanitation
Deepak R. Gajurel, Joachim Behrendt, Zifu Li, Ralf Otterpohl (Technical University Hamburg-Harburg, Germany) 511

Concept for decentralised waste and wastewater treatment
Jörn Heerenklage, Rainer Stegmann (Technical University Hamburg-Harburg, Germany) 515

Evaluation of techniques for concentrating nutrients in human urine collected in ecological sanitation systems
Jutta Niederste-Hollenberg, Joachim Behrendt, Björn Lindner, Moataz Shalabi, Ralf Otterpohl (Technical University Hamburg-Harburg, Germany) 519

Pilot plant study: design, operation and maintenance optimisation of sustainable urban stormwater ponds
Miklas Scholz (University of Edinburgh, Scotland) 523

Epuvalisation: a developing technique. Experiences, results in different countries
Dimitris Xanthoulis, Philippe Dumont, Marc Wauthelet (Faculté des Sciences Agronomiques de Gembloux, Belgium) 527

Poster presentations

Decentralised wastewater treatment - new concepts and technologies for Vietnamese conditions
Nguyen Viet Anh et al. (Center for Environmental Engineering of Towns and Industrial Areas, Vietnam) 531

Ion exchange with clinoptilolite. A potential alternative for ammonia recovery from domestic wastewater
Bilsen Beler Baykal (Istanbul Technical University, Turkey) 535

Characteristics of grey water: Polderdrift, The Netherlands
Tarek Elmitwalli (Benha High Institute of Technology, Egypt), Nidal Mahmoud, Jan Soons, Grietje Zeeman 539

Closed-loop toilet separation technology, reduces water consumption by 40 to 95% and pollution by 100%
Clint Elston (Equaris Corporation, USA) 543

Characteristics of organic matter in higher-load grey water
Naoyuki Funamizu, Keisuke Takeda, Lopez Zavala Miguel Angel, Tetsuo Takakuwa (Hokkaido University, Japan) 545

Evaluation of key factors involved in the design of horizontal subsurface flow constructed wetland*
Jesús Barragán, Anna Castro, Joan Garcia, Paula Aguirre, Eduardo Álvarez, Rafael Mujeriego (Universidad Politecnica de Catalunya, Spain) 549

Phosphorus removal from domestic sewage and possibilities of recovery
Agnieszka Karczmarczyk (Warsaw Agricultural University, Poland) 553

High quality greywater recycling with biological treatment and 2-step membrane filtration
Zifu Li, Holger Gulyas, Joachim Behrendt, Deepak R. Gajurel, Ralf Otterpohl (Technical University of Hamburg-Harburg, Germany) 555

Temperature effect on aerobic biodegradation of faeces using sawdust as a matrix
Miguel Angel Lopez Zavala, Naoyuki Funamizu, Tetsuo Takakuwa (Hokkaido University, Japan) 559

*This paper has been peer reviewed by the symposium scientific committee
Palestinian experience with enhanced pre-treatment of black wastewater from Birzeit University using a UASB septic tank system  
Ahmed Al-Juaidy, Ziad Mimi, Rashed Al-Sa’ed (Birzeit University, Palestine)  

Specific quantification of pathogenic and indicator organisms in digester samples using quantitative real-time PCR (qPCR)  
Michael Lebuhn, Gabriela Garcés, Peter A. Wilderer (Technical University Munich, Germany), Mathias Effenberger, Andreas Gronauer  

Source separation of domestic sewage components and integrated management with organic fraction from MSW  
Rafae1lo Cossu, Maria C. Lavagnolo, Maurizio Borin, Mario Gandini, Osamu Hirata (University of Padua, Italy)  

Treatment of phosphorous and bacteria by filter media in on-site wastewater disposal systems  
Gunno Renman, Agnieszka Kietlinska, Victor M. Cucarella Cabañas (Royal Institute for Technology, Sweden)  

Session F: hygienic agro-reuse  

Chairpersons  
Caroline Schönning (Swedish Institute for Infectious Disease Control, Sweden)  
Joachim Clemens (University of Bonn, Germany)  

Lectures  
Separation of faeces combined with urine diversion - function and efficiency*  
Björn Vinnerås, Håkan Jönsson (Swedish University of Agricultural Sciences, Sweden)  

Urine, faeces, greywater and biodegradable solid waste as potential fertilisers*  
Helena Palmquist (Luleå University of Technology, Sweden), Håkan Jönsson  

The use of separated human urine as mineral fertilizer*  
Jürgen Simons, Joachim Clemens (University of Bonn, Germany)  

Integrated systems on biogas production, non-polluted agricultural production and sanitation in rural China  
Xianjung Yao, Wang Hai (Ministry of Agriculture, China)  

Composting with human urine: plants fertilizer approach*  
Wantana Pinsem (King Mongkut’s Institute of Technology, Thailand), Björn Vinnerås  

Sewage sludge humification in a sequential conversion procedure  
Joachim Pabsch, Holger Pabsch, Andreas Purrmann (ipp Consult GmbH, Germany)  

Oral poster presentations  
Adapting the nutrient content of urine and faeces in different countries using FAO and Swedish data*  
Håkan Jönsson, Björn Vinnerås (Swedish University of Agricultural Sciences, Sweden)  

Safe nutrient-removal from urban sewage  
Florian von Sothen (University of Bonn, Germany)  

Nutrient uptake by different vegetable plants from source separated human urine*  
Kedar Man Prajapati (Department of Water Supply and Sewerage, Nepal), Deepak Raj Gajurel  

*This paper has been peer reviewed by the symposium scientific committee
Sanitation of blackwater and organic material*
Linda Malmén, Ola Palm (Swedish Institute of Agricultural and Environmental Engineering, Sweden), Erik Norin

Ecological sanitation: valorisation of waste sludge by composting for agricultural production
Amah Klutse, Cheick Tidiane Tandia (CREPA, Burkina Faso), Jean Malomon Yadouleton, Henri Soclo

Sustainable utilisation of human urine in urban areas - practical experiences*
Marie Adamsson, Zsofia Bán, G. Dave (Göteborg University, Sweden)

Poster presentations

The effects of sewage sludge application on the yields of berseem and forage maize in newly reclaimed soil
Ezzat M. Abd El Lateef (Field Crop Research Department, NRC, Egypt), J. E. Hall, S. R. Smith

Effect of long-term application of wastewater on bioavailability of trace elements and soil contamination
Ezzat M. Abd El Lateef (Field Crop Research Department, NRC, Egypt), J. E. Hall, S. R. Smith

Urine-separating toilet in popularising ecological sanitation in the peri-urban areas of Manipur, India
Rajkumar Dilip Singh (Government of Manipur, India)

Sustainability and optimisation of treatments and use of wastewater for irrigation in mediterranean countries
D.Xanthoulis et al. (Faculté Universitaire des Sciences Agronomiques de Gembloux, Belgium), Karsten Arnbjerg-Nielsen, Linda Hansen, Jesper Kjølholt, Frank Stuer-Lauridsen, Arne Bernt Hasling (COWI, Sweden), Thor Axel Stenström, Caroline Schöning, Therese Westrell (Swedish Institute for Infectious Disease Control, Sweden), Anders Carlsen, Bent Halling-Sørensen

Investigation of constructed wetland performance considering water reusing
Ping Gui, Ryuhei Inamori, Wenchang Zhu, Motoyuki Mizuochi, Yuhei Inamori (National Institute for Environmental Studies, Japan)

The use of sewage fertiliser products on arable land - requirements from the farmers’ perspective
Pernilla Tidåker, Cecilia Sjöberg, Håkan Jönsson (Swedish University of Agricultural Sciences, Sweden)

Session G:
feasibility studies

Chairpersons
Amah Klutse (CREPA, Burkina Faso)
Christine Werner (GTZ, Germany)

Lectures

Sanitation concepts for separate treatment of urine, faeces and greywater
Anton Peter-Fröhlich et al. (Berliner Wasserbetriebe, Germany)

*This paper has been peer reviewed by the symposium scientific committee
Contents

Ecosan modules - adapted solutions for a medium sized city in Mali
Kerstin Bark, Martin Oldenburg (Otterwasser GmbH, Germany), Waltraud Keipp

Planning of an alternative wastewater concept for two villages in NRW, Germany*
Michael Becker, Silike Geisler, Brigitte Sprengler (Emschergenossenschaft / Lippeverband, Germany)

Finding of ecosan potentials - general aspects of a project example in Yemen
Martin Oldenburg (Otterwasser GmbH, Germany), Bernd Kaltwasser, Andreas Koch

Oral poster presentations
Source-oriented sanitation in rural regions
Harm Baten (Rijnland District Water Control Board, The Netherlands), Adriaan Mels

Energy, water supply and waste water treatment for the Werbellinsee-project (ex. „Pioneer Republic Wilhelm Pieck“)
Harald Kraft (Ingenieurbüro Kraft, Germany), Andreas Schiller

SWAMP - Sustainable water management and wastewater purification in tourism facilities
Klaus Bahlo, Susanne Lehwald (Ingenieurbüro AWA, Germany)

Sanitary systems in Ouagadougou, Burkina Faso: Current practices and future potential
Patrick Bracken, Heinz-Peter Mang (GTZ, Germany)

Zero emissions concept for Water and Wastewater Management, Project Rügen, Germany
Uwe Klaus (aquaplaner, Germany)

Poster presentations
Possibility of sustainable sanitation in Japan
Shinji Miura, Masaya Kobayashi, Katsuyoshi Ishizaki (Nagasaki University, Japan), Naoko Nakagawa, Zhen Liu

Session H: decision making tools

Chairpersons
Jes La Cour Jansen (Lund Institute of Technology, Sweden)
Ralf Otterpohl (Technical University Hamburg - Harburg, Germany)

Lectures
Ecological assessment of ecosan concepts and conventional wastewater systems*
Ralf Mühleck, Andreas Grangler, Martin Jekel (Technical University Berlin, Germany)

The phosphorus calculator: A planning tool for closing nutrient cycles in urban ecosystems*
Bekithemba Gumbo (University of Zimbabwe, Zimbabwe), Hubert Savenije, Peter Keidermann

Assessment method for evaluating existing and alternative measures of urban water management*
Dongbin Huang, Roland Schertenleib, Hansruedi Siegrist, Tove A. Larsen, Willi Gujer
(EAWAG, Switzerland)
